Subject index

Acetaldehyde
Voltammetric behaviour in perchloric acid of adsorbed residues formed at open circuit from the adsorption of acetaldehyde and ethanol on a Pt(111) electrode (Cases et al.) 403
Acetonitrile
The electrochemical reduction of perezone in the presence of benzoic acid in acetonitrile (Gonzalez et al.) 293
Adenine
The effect of halide ions on the condensation of adenine at the mercury–water interface (Vetterl, De Levie) 305
n-Alkanethiol monolayers
The electrochemical desorption of n-alkanethiol monolayers from polycrystalline Au and Ag electrodes (Widrig et al.) 335
ALSV
ALSV investigation of the phase composition of electrolytic Cu + Sn alloys (Skibina et al.) 391
Amalgams
Double layer effects in the electrode kinetics of amalgam formation reactions. Part II. A comparison of the CE and IE mechanisms (Fawcett) 13
On solute–mercury interactions in dilute amalgams of main group metals (Baranski) 39
Ammonium fluoride
Current oscillations during anodic dissolution of p-Si in ammonium fluoride: an investigation using ring disc voltammetry and ellipsometry (Stumper et al.) 445
Amperometry
An enzyme amperometric sensor for toxicant determination (Budnikov et al.) 49
Aniline
Alteration of the ion exchange mechanism of an electroactive polymer by manipulation of the active site. Probe beam deflection and quartz crystal microbalance study of poly(aniline) and poly(*N*-methylaniline) (Barbero et al.) 437
Anti-corrosion film
The formation of an effective anti-corrosion film on copper surfaces from 2-mercaptobenzimidazole solution (Xue et al.) 139
Azaferrocene
Electrochemistry of inclusion complexes of organometallics. Complexation of ferrocene and azaferrocene by cyclodextrins (Strelets et al.) 179

Benzoic acid
The electrochemical reduction of perezone in the presence of benzoic acid in acetonitrile (Gonzalez et al.) 293
Brain tissue
Electrochemical evaluation of stearate-modified graphite paste electrodes: a selective detection of dopamine is maintained after exposure to brain tissue (Blaha, Jung) 317

Cadmium sulphide
Anodic growth of CdS thin films: an in situ Raman spectroelectrochemical study (Ham et al.) 417
CE mechanism
Double layer effects in the electrode kinetics of amalgam formation reactions. Part II. A comparison of the CE and IE mechanisms (Fawcett) 13
Comment
On the detection limit of the in-situ radiotracer adsorption technique. Comment on the paper by M. Gamboa-Aldeco and M. Szklarczyk (Horányi) 423
Reply to the comments by Horányi on "The detection limit of the in-situ radiotracer technique for the adsorption at the solid/solution interface" (Szklarczyk) 425
Copper
ALSO investigation of the phase composition

of electrolytic Cu+Sn alloys (Skibina et al.) 391
The formation of an effective anti-corrosion film On copper surfaces from 2-mercaptobenzimidazole solution (Xue et al.) 139
Current oscillations
Current oscillations during anodic dissolution of p-Si in ammonium fluoride: an investigation using ring disc voltammetry and ellipsometry (Stumper et al.) 445
Cyclodextrins
Electrochemistry of inclusion complexes of organometallics. Complexation of ferrocene and azaferrocene by cyclodextrins (Strelets et al.) 179
Cytochrome *c*
Vector electron transfer from a flavin Langmuir–Blodgett monolayer to cytochrome *c* (Ueyama, Isoda) 281

Dehydrogenase
Enzyme monolayer- and bilayer-modified electrodes with diaphorase and dehydrogenases (Tatsuma, Watanabe) 149
Detection limit
On the detection limit of the in-situ radiotracer adsorption technique. Comment on the paper by M. Gamboa-Aldeco and M. Szklarczyk (Horányi) 423
Reply to the comments by Horányi on "The detection limit of the in-situ radiotracer technique for the adsorption at the solid/solution interface" (Szklarczyk) 425
Diaphorase
Enzyme monolayer- and bilayer-modified electrodes with diaphorase and dehydrogenases (Tatsuma, Watanabe) 149
Difenzoquat
Electrochemical properties of difenzoquat herbicide (1,2-dimethyl-3,5-diphenyl-pyrazolium) (Pospíšil et al.) 169
Dopamine
Electrochemical evaluation of stearate -modified graphite paste electrodes: a selective detection of dopamine is maintained after exposure to brain tissue (Blaha, Jung) 317
Doping–undoping
Mechanistic studies of the electrochemical doping–undoping process of poly(1-naphthol) film using in situ multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS) (Pham, Moslih) 255
Double layer effects
Double layer effects in the electrode kinetics of amalgam formation reactions. Part II. A comparison of the CE and IE mechanisms (Fawcett) 13

Ellipsometry
Current oscillations during anodic dissolution of p-Si in ammonium fluoride: an investigation using ring disc voltammetry and ellipsometry (Stumper et al.) 445
Enzymes
An enzyme amperometric sensor for toxicant determination (Budnikov et al.) 49
Enzyme monolayer- and bilayer-modified electrodes with diaphorase and dehydrogenases (Tatsuma, Watanabe) 149
Ethanol
Voltammetric behaviour in perchloric acid of adsorbed residues formed at open circuit from the adsorption of acetaldehyde and ethanol on a Pt(111) electrode (Cases et al.) 403

Ferrocene
Electrochemistry of inclusion complexes of organometallics. Complexation of ferrocene and azaferrocene by cyclodextrins (Strelets et al.) 179
Flavin
Vector electron transfer from a flavin Langmuir–Blodgett monolayer to cytochrome *c* (Ueyama, Isoda) 281
Formaldehyde
Comparative investigation of formic acid and formaldehyde electro-oxidation on palladium in acidic medium. Effect of surface oxides (Manzanares et al.) 159
Formic acid
Comparative investigation of formic acid and formaldehyde electro-oxidation on palladium in acidic medium. Effect of surface oxides (Manzanares et al.) 159

Glassy carbon electrodes
Effects of wavelength, pulse duration and power density on laser activation of glassy carbon electrodes (Rice, McCreery) 127
Gold
The electrochemical desorption of n-alkanethiol monolayers from polycrystalline Au and Ag electrodes (Widrig et al.) 335
Graphite paste electrodes
Electrochemical evaluation of stearate-mod-

ified graphite paste electrodes: a selective detection of dopamine is maintained after exposure to brain tissue (Blaha, Jung) 317

Halide ions
The effect of halide ions on the condensation of adenine at the mercury–water interface (Vetterl, De Levie) 305

o-Hexylaniline
Synthesis and polymerization of *o*-hexylaniline. Characterization of the corresponding polyaniline (Geniès, Noël) 89

IE mechanism
Double layer effects in the electrode kinetics of amalgam formation reactions. Part II. A comparison of the CE and IE mechanisms (Fawcett) 13

Ion exchange
Alteration of the ion exchange mechanism of an electroactive polymer by manipulation of the active site. Probe beam deflection and quartz crystal microbalance study of poly(aniline) and poly(*N*-methylaniline) (Barbero et al.) 437

Kinetics
Double layer effects in the electrode kinetics of amalgam formation reactions. Part II. A comparison of the CE and IE mechanisms (Fawcett) 13

Langmuir–Blodgett monolayer
Vector electron transfer from a flavin Langmuir–Blodgett monolayer to cytochrome *c* (Ueyama, Isoda) 281

Laser activation
Effects of wavelength, pulse duration and power density on laser activation of glassy carbon electrodes (Rice, McCreery) 127

Lead
Changes in the growth mode of electrodeposited silver layers. Surface rearrangements induced by the presence of lead adatoms (Carro et al.) 361

2-Mercaptobenzimidazole
The formation of an effective anti-corrosion film on copper surfaces from 2-mercaptobenzimidazole solution (Xue et al.) 139

Mercury
On solute–mercury interactions in dilute amalgams of main group metals (Baranski) 39
The effect of halide ions on the condensation of adenine at the mercury–water interface (Vetterl, De Levie) 305

MIRFTIRS
Mechanistic studies of the electrochemical doping–undoping process of poly(1-naphthol) film using in situ multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS) (Pham, Moslih) 255

1-Naphthol
Mechanistic studies of the electrochemical doping–undoping process of poly(1-naphthol) film using in situ multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS) (Pham, Moslih) 255

Nernst equation
Nernst equation complicated by electric random percolation at conducting polymer-coated electrodes (Aoki) 1

Palladium
Comparative investigation of formic acid and formaldehyde electro-oxidation on palladium in acidic medium. Effect of surface oxides (Manzanares et al.) 159
Preliminary study of the electrochemical adsorption behaviour of a palladium modified Pt(111) electrode in the whole range of coverage (Clavilier et al.) 429

Perchloric acid
Voltammetric behaviour in perchloric acid of adsorbed residues formed at open circuit from the adsorption of acetaldehyde and ethanol on a Pt(111) electrode (Cases et al.) 403

Percolation
Nernst equation complicated by electric random percolation at conducting polymer-coated electrodes (Aoki) 1

Perezone
The electrochemical reduction of perezone in the presence of benzoic acid in acetonitrile (Gonzalez et al.) 293

Photoelectrochemistry
Photoelectrochemical properties of polyaniline films (Kalaji et al.) 113

Platinum
Preliminary study of the electrochemical adsorption behaviour of a palladium modified Pt(111) electrode in the whole range of coverage (Clavilier et al.) 429

Voltammetric behaviour in perchloric acid of adsorbed residues formed at open circuit from the adsorption of acetaldehyde and ethanol on a Pt(111) electrode (Cases et al.) 403

Polyaniline

Photoelectrochemical properties of polyaniline films (Kalaji et al.) 113

Synthesis and polymerization of *o*-hexylaniline. Characterization of the corresponding polyaniline (Geniès, Noël) 89

Polymer film electrodes

Study of the sorption phenomenon accompanying the break-in process of polymer film electrodes using a quartz crystal microbalance (Bácskai, Inzelt) 379

Polymer-coated electrodes

Nernst equation complicated by electric random percolation at conducting polymer-coated electrodes (Aoki) 1

Polypyrrole

Controlled permeability of functionalized polypyrrole films by use of different electrolyte anion sizes in the electropolymerization step (Cosnier et al.) 71

Pyrrole

Electrochemical behavior of polypyrrole/Kodak AQ composite polymeric films (Wang et al.) 269

Quartz crystal microbalance

Alteration of the ion exchange mechanism of an electroactive polymer by manipulation of the active site. Probe beam deflection and quartz crystal microbalance study of poly(aniline) and poly(*N*-methylaniline) (Barbero et al.) 437

Study of the sorption phenomenon accompanying the break-in process of polymer film electrodes using a quartz crystal microbalance (Bácskai, Inzelt) 379

Radiotracer technique

On the detection limit of the in-situ radiotracer adsorption technique. Comment on the paper by M. Gamboa-Aldeco and M. Szklarczyk (Horányi) 423

Reply to the comments by Horányi on "The detection limit of the in-situ radiotracer technique for the adsorption at the solid/solution interface" (Szklarczyk) 425

Raman spectroelectrochemistry

Anodic growth of CdS thin films: an in situ Raman spectroelectrochemical study (Ham et al.) 417

Ring–disc voltammetry

Current oscillations during anodic dissolution of p-Si in ammonium fluoride: an investigation using ring disc voltammetry and ellipsometry (Stumper et al.) 445

Rotating disk electrode

Polythiophene electrogeneration on a rotating disk electrode. The influence of water on polymerization and polymer properties (Otero, Rodríguez) 219

Silver

Changes in the growth mode of electrodeposited silver layers. Surface rearrangements induced by the presence of lead adatoms (Carro et al.) 361

The electrochemical desorption of n-alkanethiol monolayers from polycrystalline Au and Ag electrodes (Widrig et al.) 335

Single crystal substrates

A model for the adsorption of a commensurate layer of metal ions on a single crystal substrate (Lehnert, Schmickler) 27

Spectroelectrochemistry

Spectroelectrochemical properties of poly(4,4′-dialkyl-2,2′-bithiophenes) and poly(3-alkylthiophenes). A comparative study (Łapkowski et al.) 57

Stearate

Electrochemical evaluation of stearate-modified graphite paste electrodes: a selective detection of dopamine is maintained after exposure to brain tissue (Blaha, Jung) 317

Thiophene

Electrochemical polymerization of poly(thiophene-3-acetic acid), poly(thiophene-co-thiophene-3-acetic acid) and determination of their molar mass (Albery et al.) 239

Polythiophene electrogeneration on a rotating disk electrode. The influence of water on polymerization and polymer properties (Otero, Rodríguez) 219

Spectroelectrochemical properties of poly(4,4′-dialkyl-2,2′-bithiophenes) and poly(3-alkylthiophenes). A comparative study (Łapkowski et al.) 57

Tin

ALSV investigation of the phase composition of electrolytic Cu + Sn alloys (Skibina et al.) 391

Toxicant determination
An enzyme amperometric sensor for toxicant determination (Budnikov et al.) 49
Tryptophol
Electrochemical and enzymatic oxidation of 5-hydroxytryptophol. Part II. Studies at physiological pH (Cheng et al.) 187
Voltammetry
Voltammetric behaviour in perchloric acid of adsorbed residues formed at open circuit from the adsorption of acetaldehyde and ethanol on a Pt(111) electrode (Cases et al.) 403
